Your cameras can do more than record

From passive surveillance to proactive operational management.

MONITOR

Use existing compatible CCTV infrastructure for AI-powered video monitoring.

DETECT

Identify configured conditions, anomalies and operational exceptions.

RESPOND

Notify responsible teams and connect observations to corrective workflows.

What is Swipetask DETECT?

A Swipetask intelligent video monitoring proposition.

AI video analytics

Configurable detection rules for people, vehicles, movement, loitering and other defined conditions.

Virtual patrols

Scheduled AI-assisted reviews of camera snapshots against operational rules and standard procedures.

Capabilities subject to camera compatibility, configuration and site-specific validation.

Five connected capabilities

Designed to make existing camera infrastructure more operationally useful.

VISION

Configurable AI video analytics

PATROL

Scheduled virtual camera reviews

ALERT

Event notifications and escalation

EVIDENCE

Video review and investigation

INSIGHTS

Monitoring reports and trends

Your virtual workforce, working alongside your people

Automated visual checks

Reduce repetitive monitoring and manual screen review.

Proactive exception alerts

Flag predefined risks and unusual conditions earlier.

Better workforce focus

Direct human attention to issues requiring judgement or intervention.

Operational visibility

Support reporting, investigations and improvement.

Where DETECT can add value

Illustrative use cases — individual detections require site validation.

COMMERCIAL BUILDINGS	Access points, unattended areas and abnormal activity
CAMPUSES & HEALTHCARE	Public-area conditions, crowding and service exceptions
RETAIL & MIXED-USE	Customer flow, queue conditions and unusual activity
INDUSTRIAL & LOGISTICS	Gate conditions, vehicle movement and monitored hazards
ESTATES	Common-area checks and recurring virtual patrols

From detection to action

The integrated Swipetask workflow is your strategic benefit.

01

DETECT

Identify a configured event

02

ALERT

Notify the responsible team or individual Crew

03

ASSIGN

Create a Swipetask task / Work Order

04

VERIFY

Record action and evidence

05

IMPROVE

Review performance and recurrence

*Automatic task creation and bidirectional status updates can, apart from through the Swipetask App, also work with other applications such as Whatsapp, through integration.

A practical example: open access gate

A simple, measurable signal-to-outcome workflow.

CAMERA

The Virtual patrol (AI analytics) flags an open gate

REVIEW

Operator confirms the exception (’human-in-the-loop’)

WORKFLOW

Swipetask can intelligently assigns,

- a site check/Urgent task
- creates an Inspection checklist
- Create a Periodic task etc

CLOSURE

Employee records corrective evidence & closes the case and depending on the rules auto-create & distributes an Event Report
