HIGHWAY / ROAD MAINTENANCE-SERVICES MODULE

End-to-end road maintenance, made easy

One easy-to-use solution to manage every maintenance activity along your network — with comprehensive reporting built in.

Plan
Routine, periodic and urgent work, scheduled by highway, route and asset.

Execute
Crews follow tasks on mobile — GPS, time-stamps and photos captured automatically.

Prove
Automated reports on performance, SLAs, quality and proof-of-presence.

FUNCTIONAL SCHEMA

How Swipetask HIGHWAY works

1 SET UP

Admin platform

- Locations, areas and routes
- User management
- OPS Manager oversight

2 SCHEDULE & EXECUTE

Supervisor dashboard (cloud)

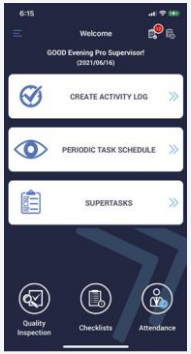

- Daily tasks and periodic schedules
- Urgent and ad-hoc tasks
- Field teams and crews complete tasks on mobile

3 REPORT

Data creation & reporting

- Team, route, shift & crew performance
- Tasks and completions
- Client service requests
- KPI / SLA adherence
- Quality & audit inspections
- Utilisation & task durations
- Proof-of-presence & incidents

Optional client dashboard

Supervisor mobile app

KEY FUNCTIONALITIES

Everything the maintenance cycle needs

Routine & preventive maintenance
Daily routine tasks plus periodic maintenance programs.

Urgent requests
Urgent maintenance and client service requests, dispatched fast.

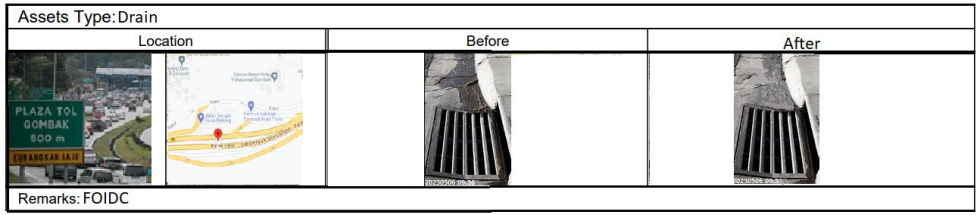

Shift scheduling
Schedule shifts and re-assign tasks on the fly.

Geo-tagged evidence
GPS location and before, during & after photos on every report.

Automated reports
Extensive reporting generated automatically.

Quality audits
Structured quality audit and inspection checklists.

Sample auto-generated report
Asset type, location, and before & after images with remarks — produced straight from the field.

AT A GLANCE

An end-to-end digital solution for highway maintenance services

- Instant work orders by highway, location, area, asset, service type and SLA parameters
- Handles exceptions, add-on orders and urgent requests
- Target times defined; actual times and progress tracked in real time
- Optimised staff deployment, including way-finding to task locations
- GPS proof-of-presence, with every image time-stamped
- Comprehensive reporting tools
- Works offline — syncs when back in coverage
- Integrates with AI CCTV cameras and other systems via APIs

Swipetask

INTRODUCING

AOI — AI-assisted Operational Intelligence

AOI helps organizations make sound decisions that advance their Organizational Intent™ — informed by four foundations.

Experience

Over a decade of operational know-how across five industries.

Evidence

Decisions grounded in what actually happened in the field.

Trust

Guidance your teams and clients can rely on.

Continual learning

Sharper with every task, shift and season.

Institutional wisdom, amplified by AI *— delivered through a minimalist interface, not flashy dashboards.*
