Swipetask / SENSORTOILET

Swipetask SensorToilet

Smarter washrooms. Actionable signals. Combine guest feedback, configurable IoT sensors and cleaning-team workflows in one connected solution.

ONE CONNECTED OPERATIONAL LOOP

Swipetask / SENSORTOILET

From sensor readings and guest feedback to action

SensorToilet brings Swipetask LINK feedback panels together with a configurable set of washroom sensors.

FEEDBACK

Guest ratings from Swipetask LINK panels.

SENSE

Readings from a configurable set of washroom sensors.

ACT

Events are evaluated against rules and thresholds, and corrective tasks are routed through the Swipetask Productivity supervisor workflow.

What is Swipetask SensorToilet?

A smart washroom solution built from two connected parts.

LINK FEEDBACK PANELS

A highly configurable feedback panel in the washroom. Guests rate the visit in seconds, and configured rules can turn feedback into a task.

CONFIGURABLE IOT SENSORS

A set of washroom sensors, chosen for each site, that cover people traffic, odour, temperature and the state of consumables.

Sensor selection, communications and installation are tailored to the deployment.

Configurable sensor options

PIR / PEOPLE TRAFFIC

Signals washroom usage to support demand-based cleaning.

AMMONIA

Supports odour-related monitoring and threshold alerts.

TEMPERATURE

Optional environmental monitoring, subject to sensor configuration.

JUMBO-ROLL DISPENSER

Monitors supply levels to help avoid empty dispensers.

HAND-TOWEL DISPENSER

Optional paper-towel replenishment monitoring.

SOAP DISPENSER

Detects replenishment needs based on configured sensing.

Sensor selection, communications and installation are tailored to the deployment.

One connected operational loop.

Turn washroom conditions into timely cleaning, replenishment and service actions, with clear accountability.

01

CAPTURE

Guest feedback from LINK panels and sensor readings from connected devices.

02

EVALUATE

Site-specific thresholds and rules determine when attention is required.

03

ALERT AND ASSIGN

A corrective task is created for supervisors to acknowledge and dispatch.

04

COMPLETE AND REVIEW

Cleaning staff respond. Timestamps, task status and response data support management reporting.

What facility teams gain

DEMAND-BASED CLEANING

Use washroom traffic and feedback to prioritise service where it is needed.

FASTER ISSUE VISIBILITY

Raise alerts for poor feedback, odour conditions or low consumables.

CLEARER ACCOUNTABILITY

Track task acknowledgement, assignment and response across teams.

OPERATIONAL INSIGHT

Review patterns by time, location, device and response history.

Swipetask / SENSORTOILET

Built around your washroom

Deploy a suitable combination of LINK panels and IoT devices.

THRESHOLDS

Configure triggers by sensor, location and operating period, including day and night variations where supported.

SUPERVISORS AND MANAGEMENT

Supervisors use Swipetask Productivity to receive and manage tasks. Management can review feedback, activity and service-response information.
